* Tableau Reader is a free software program you can download at tableau.com/products/reader that is used to open Tableau analyses. This software is updated often. If your copy of Tableau Reader doesn't work any more, download and install a new version using the above link.

Tableau Desktop is the software program used to create analyses. More information is available on Tableau's website, <http://www.tableau.com/>. Individual users at IC have Tableau Desktop licenses; there is no college site license.
