

Pierce Racing 1998

1998 was an incredible season for the Southern Tier's Thunder Mountain Track Champion, [Cliff Pierce](#). Cliff was referred to at the track as "The Flying School Teacher." His #9 "Hornet" flew pass the finish line earning TEN checkered flags during the feature race, and won several heat races throughout the season. Cliff is among several drivers in his racing family. Racing has been in their blood for many generations, and is expected for more generations to come. Cliff and Nancy's five-year old son, Kyle, is already a big racing fan and has his eyes set on a car "when he gets bigger." It is hoped by Nancy that their daughter, Kelsey, will not be so heavily into racing, and will be content to be "the boys'" biggest fan!

The pink number 2 car, is younger brother, **Curt Pierce**.

Curt is in his second year of racing dwarf cars. He is also the driver of the number 2 car in the 4 cylinder modified.

Dwarf car racing has become increasingly popular in this area. It is relatively new to the racing arena. Starting only 5 years ago, the membership has grown by 75%. It is hoped that this new class of drivers will continue to grow, along with the fans it draws to the speedways. Other local tracks that we are proud to announce that hosted the dwarf cars in 1998, included: Brewerton Speedway, Brewerton, NY Afton Raceway, Afton, NY Fulton Speedway, Fulton, NY.
