

# ITHACA COLLEGE

School of Humanities and Sciences

Fall 2019

## Calendar of Events Environmental Studies and Sciences

**Tuesday, 11/19, 12:10 PM, Textor 103:** Greenwood Energy, the developer responsible for IC's solar farm in Geneva, NY, will give a presentation about renewable energy in the U.S. and will talk about summer internship opportunities with Greenwood, as well as their parent company Libra Group.

**Wednesday, 11/20, 5 PM, Clark Lounge:** Tom Hirasuna, from The Climate Reality Project (established in 2006 by Al Gore), will present "A Moment of Truth" as a part of the "24 Hours of Reality: Truth in Action" lectures which are taking place worldwide in November 2019. Recent weather events clearly demonstrate that we must change our behavior and attitudes. New developments in technology give hope that we can change. The key question to consider now is, "Will we change?" Some of Climate Reality's recent efforts in New York State and ways to get involved now will also be highlighted. Tom's presentation will be followed by a brief introduction to the Sunrise Movement, a youth-led organization focusing on climate action and the Green New Deal.
